## President's Column

Greetings from the WQAW Board of Directors!

We trust you've had an eventful, family, friend and fun-filled summer! Again, there's almost nothing better than Wisconsin in the summertime.

Tell me, have you ever found yourself saying or thinking any of the following.....

- I learn helpful Wisconsin-specific and more local information at WQAW conventions that energizes me.
- I learn from others in our industry while talking with friends-and even competitors- at WQAW conventions.
- Almost the only time I get to see ????? is at the WQAW conventions.

And.....this year you're asking: What's all the hub-bub about the new Restricted Plumber licensing exam and the new training options?

**So, if you have said- or thought- any of those things, why would you miss our upcoming WQAW convention in the Wisconsin Dells Kalahari Resort?**

We have a full agenda including education, exhibiting, banquet and even golf. Don't miss the best opportunity to interact with fellow industry people at one of the best family resorts in the state! Register today!

Who knows, you might even see big Paul Bunyan and his blue ox.

**In this issue, please give particular attention to** updates and information about our new Restricted Plumbing licensing exam. Read over how you are now able to have candidates take the exam using the national WQA instead of the State of WI. Learn about our new web-based training program available to candidates without leaving the dealership. Understand how your candidates can follow our new training and obtain credentials with both the State and, at the same time, with WQA. Your businesses now have options not ever available before and you want to be informed how to take advantage of these opportunities!

Thank you for your support of the WQAW! I look forward to seeing you in "the Dells"!

**Don Meredith**

WQAW President  
Meredith's Culligan Water

## Why Should I Contribute to the WQAW PAC

By Michelle Kussow, The Capitol Group, LLC

In 2006, the Water Quality Association of Wisconsin created a Political Action Committee (PAC) which allows WQAW members to pool financial resources together to participate in the political process and help elect supporters of our industry.

We ask that WQAW members consider making a personal donation to the PAC. Here are a few key reasons why it is important:

**Put your money where your mouth is.** Whether we like it or not, politics is driven by money. And if we don't contribute and play an active role in the political process, other groups that may have conflicting and competing interests will and their voice will be heard over ours.

**You care about your job, your business and the industry.** Making political contributions helps to ensure that the right candidates are elected. When these candidates are elected, they are able to vote on issues that affect your business and the industry allowing the water treatment industry in Wisconsin to thrive.

**RESULTS** **WQAW gets results.** Contributions to the WQAW PAC have helped us elevate our profile and achieve legislative victories such as making changes to the JPRA Exam and Wisconsin's Product Approval process.

**Make sure that the right people are elected.** When the wrong people are elected, they introduce legislation that costs you time and/or money. For example, in 2010, changes were made requiring WQAW members to register as a Building Contractor which required paperwork to be completed and cost \$100 to register. In 2012, this provision was repealed.

**And, if that's not enough reason to contribute....**

Everyone who contributes between now and the WQAW Expo on September 23 & 24th will be entered into a drawing for two tickets for the **Packers vs Cowboys** game on October 16th.

A winner will be drawn during the Annual Meeting at 8:00 am Saturday, Sept. 24th.

**Complete and turn in with payment to:**

WQAW  
33 E. Main St., Suite 701  
Madison, WI 53703

## WQAW's Formula of Success

By Jim Luedtke, Culligan of Rice Lake & WQAW Board Member

WQAW will be introducing the Formula of Success at the WQAW Convention. The new program offers training for your learners and provides testing for the Wisconsin Journeyman Restricted Appliance plumbing license.

The Formula of Success combines independent online study of six badges through **WQA's Modular Education Program** (MEP) and adds 6 to 8 weeks of webinar education through the WQAW's Installers Course, which Jim Davis, instructor of the **WQAW Cram Course**, will teach. The webinar will be live and have opportunities for Q & A in each session.

The combination of the six badges through WQA's Modular Education Program and the **Installers Course** webinar training will provide the education needed to pass the WI JPRA Exam.

The steps within the Formula of Success are optional. Individuals may pick and choose to customize the education they need, but it's highly recommended to do all steps to properly prepare for the JPRA exam.

The WQA & WQAW have been working for over three years to prepare the training materials, and ability to have 3rd party testing to administer the exam. All this hard work has been worth it to provide training to help your employees to become licensed Journeyman Restricted Appliance Plumbers!

I hope that you will support this new program and encourage your employees to enroll in the courses when available.

The WQAW Board of Directors would like to recognize Dr. Tanya Lubner for her hard work and dedication

## Dr. Tanya Lubner to receive Friend of WQAW Award

to the Water Quality Association of Wisconsin with a Friend of WQAW award during Friday's Banquet during the 2016 WQAW Convention.

Tanya has served as WQA's director of Education & Professional Certification since 2005. In this role, she oversees the development of new program areas, creation of educational materials and examinations.

Tanya has traveled the state of Wisconsin to attend WQAW Conventions. She has provided important educational information in convention seminars for credits for WQAW Members.

Tanya has also played a pivotal role in creating the WI JPRA exam, working with Wisconsin's DPSP for approval to administer the exam, and advising on WQAW's new Formula of Success.

Thank you Tanya for all you do for the WQAW!

## How Heavy Flooding Can Damage Drinking Water

**By Scott Gordon, WisContext** — *Reprinted with permission. This article was originally published on WisContext, which produced the article in a partnership between Wisconsin Public Radio, Wisconsin Public Television and Cooperative Extension. Photo credit: WisContext..*

**Heavy rainstorms in northwestern Wisconsin** on Monday, July 11, led to flooding throughout the region, washing out roads across several counties and causing at least one deadly accident. The state Department of Transportation closed portions of multiple state highways, and Gov. Scott Walker declared a state of emergency in Ashland, Bayfield, Burnett, Douglas, Iron, Price, Sawyer and Washburn counties.

The flooding also poses a less visible, but still significant threat: It can result in more contaminants in the area's drinking water supplies.

Despite bordering Lake Superior, northwestern Wisconsin overwhelmingly relies on groundwater for its drinking water supply. About 25 percent of Wisconsinites get their drinking water from private groundwater wells, which are especially predominant in more rural areas. Unlike public utilities, private wells aren't subject to similar regulations at state and federal levels, and their owners bear the responsibility for the monitoring and ensuring the quality of their water.

Here's how flooding can affect well water supplies, generally and in the context of the July flooding in northwest Wisconsin.

### **Why are floods threatening to well water?**

Contaminants like bacteria and nitrate flow from the surface into groundwater supplies from farms, septic systems, and other sources, aided by rain and simple gravity. A sudden downpour like the 10-inch flash flood that inundated northwestern Wisconsin on July 10 only speeds up that process. The Wisconsin Department of Natural Resources warned in a press release that "well owners who observe flooding or changes in their water should assume their wells are contaminated," but wells in areas that don't show obvious signs of flooding could be in danger too.

Residents should not, however, expect wide-scale contamination of the region's groundwater. "Most likely [the impact] is going to be scattered," said Jason Fischbach, an agricultural agent with University of Wisconsin-Extension Bayfield County.

People should be most concerned he added, if they notice water pooling near their well casing. In some cases, the rain and floodwaters moved so quickly that they didn't have much time to permeate into a wide area of ground. "It's sort of like watering your garden with a firehose on full-blast," Fischbach said.

### **What about people who get water from a public utility?**

Except for customers of Ashland and Superior's water utilities (about 40,000 people total), which source from Lake Superior, most northern Wisconsinites are drinking groundwater. The DNR's press release noted that public utilities are "designed and operated to keep out contaminants," but that is not the full story. Wisconsin water utilities vary widely in which treatment processes they do and don't carry out. In fact several utilities in the counties hit by flooding — including the city of Washburn's — do not currently disinfect their water to knock out bacteria.

## WQAW Early Bird Drawing

There are lots of reason to attend the 2016 WQAW Convention on September 23 & 24, 2016 at the Kalahari Resort. You can network with peers in the industry, you can earn 3 continuing education credits and you could possibly win one free night at the Kalahari Resort!

**Register for the WQAW Convention by September 2nd to be entered** into the Early Bird Drawing for one night stay gift certificate to the Kalahari Resort. The winner will be announced during the Membership Meeting on Saturday, September 24th. **Don't Delay! Register Today!**

## Flooding Damage — continued

Water utilities have many reasons for why they choose not to carry out a disinfection process like hypochlorination or ultraviolet-light disinfection. First, if they use groundwater, federal and state regulations don't require them to do so. One reason is a long-held premise that groundwater is less susceptible to bacteria and virus contamination — an assumption that recent research in Wisconsin has upended. There's also the matter of cost: Smaller water utilities don't have sufficient budget or staff, and their municipal governments may not want to raise rates. And some people just don't like the idea of adding chemicals to their water.

Public water utility customers do have an advantage in the case of catastrophic flooding, though, because utilities have the resources (and a regulatory obligation) to monitor their water for bacteria and other contaminants. Additionally, even a community with modest resources might be able to provide emergency funding for improved water treatment if there's a need and enough public pressure to do so. People who use private wells must do it themselves.

None of this is to say that residents in the affected northwestern Wisconsin counties should panic about their drinking water if they use wells. But they can take basic steps to make sure their water supply is safe. Well users can have their water tested, and utility customers can contact their providers and look up their treatment practices and testing results in the DNR's searchable database.

### **What precautions can well owners take, and what resources can help them protect their water quality?**

Above all, private well owners need to inform themselves about potential water contaminants in the state and in specific local areas. The Well Water Quality Viewer, created by the Center for Watershed Science and Education, offers extensive searchable data on test results from private wells across the state. UW-Extension groundwater specialist Kevin Masarik has written a guide to determining appropriate tests for a specific well, and public and private labs can test samples and help with analyzing results and offering additional information about options. The DNR offers a series of recommendations, for well owners dealing with flooding, including links to certified testing labs and companies that can help maintain and disinfect private wells and plumbing systems. For people who grow their own food, UW-Extension has a guide to help ensure produce from flooded gardens is safe.

Ongoing updates about the flooding in northwestern Wisconsin are being provided by Wisconsin Emergency Management. The DNR and state Department of Health Services offer additional information about coping with and recovering from floods, including a Wisconsin Flood Toolkit, and UW-Extension offers a Disaster Handbook and online guide to disaster management and recovery.

## 2016 WQAW Convention

### ★ Schedule of Events ★

#### Kalahari Resort

1305 Kalahari Drive, Wisconsin Dells, WI 53965

Ph: (877) 253-5466

Standard Room.....Thur \$109, Fri \$119, Sat \$149

2 Room Suite.....Thur \$179, Fri \$189, Sat \$219

African Queen Suite.....Thur \$239, Fri \$249, Sat \$269

Room block available until: **Sept. 2, 2016**

★Online Registration is now available at: <http://www.wqaw.com/Events/> ★

#### **Friday, September 23, 2016**

10:00 am.....**Golf Tournament Trappers Turn Golf Course**, Wisconsin Dells

3:00 pm.....**Registration Desk** - Opens at the Kalahari Resort

3:00 pm – 5:00 pm.....**Table Top Exhibit Set-Up**

5:00 pm – 6:30 pm.....**Table Top Exhibits Open and Reception**

6:30 pm.....**Banquet and Awards Ceremony**

#### **Saturday, September 24, 2016**

7:00 am – 9:30 am.....**Breakfast Buffet** for registered attendees

8:00 am – 8:30 am.....**WQAW Membership Meeting**

8:30 am – 9:30 am.....\* **Push-Fit Connections** presented by **Jeff Nehring**, *John Guest Company*. Learn the advantages of Push-Fit fitting solutions for water softeners, filtration, reverse osmosis and plumbing and their international application. Plus, the approval/certification needed for the State of WI.

9:45 am – 10:45 am.....\***Balancing Soft Water and Fresh Water** presented by **Emily Jones**. *Pollution Prevention Specialist, Madison Metropolitan Sewerage District*. Water quality professionals play a key role in helping wastewater treatment plants meet chloride reduction goals, and local companies have been important partners in MMSD's salt reduction efforts. This session will include an overview of the chloride issue, options for facilities to reduce their salt use, and case studies from facilities that have successfully reduced salt.

11:00 am – Noon.....\* **Review of Plumbing Guidelines of WI State-Owned Properties** presented by **Lance Fitzgerald**, *Director with Culligan International*. Attendees will receive an overview of Master specifications related to plumbing of state-owned properties, including studies that generated changes on background bacteria and its effect on plumbing supplies, plus an overview of the disinfection of water treatment equipment referenced by the WQA booklet for disinfection of water treatment equipment.

Noon.....**Program Concludes**

12:30 pm – 3:30 pm.....**WQA Certification Exam** (pre-registration with WQA is required for exams)

\*Seminars will offer continuing education credits for State of Wisconsin and WQA certification.

# Water Quality Association of WI presents Restricted Appliance Plumbing Exam “Cram Session”

Wednesday, September 28, 2016 in DeForest, WI.

On Wednesday, September 28, 2016, the WQAW will be holding a “Cram Session” for anyone registered to take the Restricted Appliance Plumbing exam. The instructor is **Jim Davis**, who is a retired State of Wisconsin Plumbing Instructor. He will be teaching an 8+ hours focused session with information designed to specifically prepare you for the exam. Ultimately, we intend to assist you and your employees to increase your chance of a passing grade.

## Register your learners for this opportunity!

### Registration Fees

- ♦ includes educational seminar and lunch.
- ♦ \$199 for WQAW members
- ♦ \$299 for non members

### Cram Session Schedule

7:30 a.m. Registration  
8:00 a.m. Restricted Appliance Plumbing Exam Review  
Noon Lunch Break – Lunch provided.  
4:30 Seminar Concludes. Drive Safely.

### Topics Reviewed

- ♦ Code Book Review -Including sections 8233, 40 and 41
- ♦ Fixture Count Review
- ♦ Definitions
- ♦ Basic Plumbing Math
- ♦ Blueprint & Drafting
- ♦ Sizing the Water Supply System
- ♦ Water Treatment Handbook
- ♦ Cross Connection Control Manual

#### PLEASE BRING:

- \* calculator
- \* 3 highlighters
- \* code book (2009 or newer).

### Featured Speaker

- ♦ **Jim Davis**, retired State of WI Plumbing Instructor.

### Who should attend?

- ♦ Anyone registered to take the **Journeyman** or **Master** Restricted Appliance Plumbing exam that would like to prepare and review for the state exam.
- ♦ Anyone who failed the exam and would like a refresher course to prepare for the exam again.

### Exam Cram Session

- ♦ This session is to help prepare individuals review and prepare to take the Restricted Appliance Plumbing exam. This is NOT a session to cover the required course work.

### Date & Location

Wednesday, September 28, 2016
